### ABOUT

I am a software engineer passionate about JavaScript, with solid technical experience in Vue and its related frameworks and UI libraries. With a focus on end users, I utilise best practices to always produce clean and maintainable code, while constantly checking for new technologies to play around with. I am a team player who values straight-forward communication, exchanging knowledge, and always keeping a positive attitude in order to support teammates and achieve my company's goals.

### EXPERIENCE

01.2021 - Today (1 year and 2 months): Junior Front-end developer  
Artnight (Realtainment GmbH)

#### Core tasks:

- Building, maintaining and releasing features using Nuxt and VSF2 app based on stakeholders' requirements while keeping apps performant and mitigating codebase complexity with a strong collaboration with BE (Pimcore):
  - o Set up **in-app notifications'** system MVP using ravenhub.io (Nuxt)
  - o Set-up **e2e testing** and mitigate tests flakiness using cypress.io (Nuxt)
  - o Set up **personalised Gift-card feature** (VSF2)
- Building, maintaining and releasing internal UI library using SCSS/Post-CSS, storybook, and Buefy:
  - o Write easy to read and reusable UI components while keeping a high level of performances
- Reporting and fixing bugs
- Keeping technology up to date:
  - o Update Nuxt 2 app to Nuxt Bridge (Nuxt 3 when not Beta)
- Scrum methodology:
  - o Dailies, sprint planning, sprint refinement, retrospective
  - o Together with PM and Design, identify pitfalls and code limitations in early stage of features' creation
  - o Evaluate story points based on complexity

#### Side tasks:

- Presenting features to stakeholders and company
- Write documentation (publishing package, docker test env commands, conventional commits...) hosted on Digital Ocean and notions
- Managing project (interaction with stakeholders, wrote Epic and tickets for notification feature, establish design using Figma)

### PROJECTS

#### Vue.js - VGG-garden (production)

Building a full-stack app for a community garden featuring: contact form, translation, progressive images, smooth scrolling.

 linked

 github

### SKILLS

#### Languages:

Javascript  
Node.js  
HTML  
CSS

#### Frameworks:

Vue.js  
Nuxt  
VSF  
React.js  
Express.js

#### Data base:

PostgreSQL

#### Other:

Bootstrap  
Buefy  
vue-formulate  
i18n plugin  
Amazon Web Services (S3, SES)  
JSON  
Eslint  
Figma  
Webpack  
GIT/Gitlab
